Conditions in Cameroon Warrant Temporary Protected Status Designation

Temporary Protected Status (TPS) is a temporary protection that allows people from a designated country to remain in the US while conditions in their home country make safe return impossible. The Secretary of Homeland Security can designate a country for TPS if the country is experiencing ongoing armed conflict, natural disaster, or other extraordinary and temporary conditions. TPS allows its beneficiaries to stay and work in the United States during the designation period. It is a life-saving protection, especially for those who are ineligible for or who have been denied asylum.

While countries such as Myanmar, Syria, and Venezuela have recently been designated or redesignated for TPS, several equally-deserving majority-Black countries have been left behind. The chart below demonstrates that conditions in Cameroon, a West African country experiencing multiple armed conflicts, are similarly dire to those in Myanmar, Syria and Venezuela. As such, Cameroon deserves to be designated for TPS, giving life-saving protection to Cameroonians who are otherwise being deported en masse back to extreme danger.
